

Mock Assessment 2 Documentation

User Story 1 – Homepage & Destination Showcase (React Basics):

Developed a responsive Travel Booking Homepage displaying featured destinations and offers using React components, demonstrating JSX, Virtual DOM, Props, State, and Event Handling.

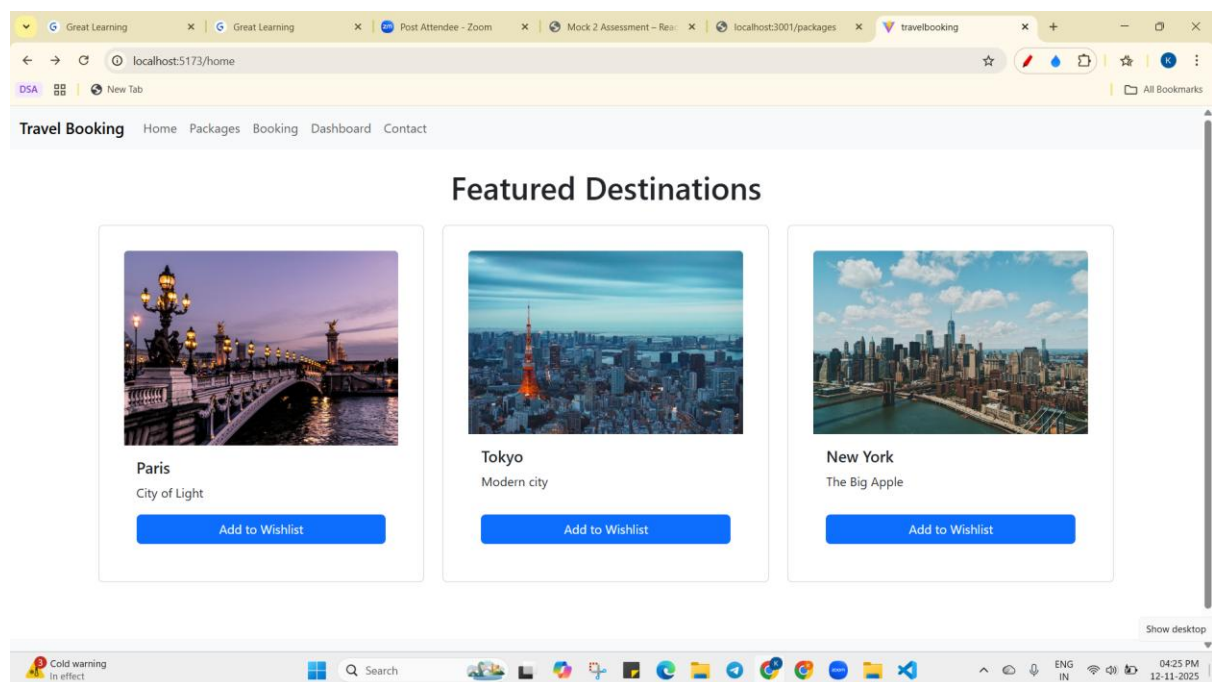

User Story 2 – Travel Package Management (Routing & Data Integration):

Implemented a Travel Package Management module to display package details fetched from a json-server backend, using React Router for navigation and lifecycle methods for data loading.

User Story 3 – Booking Form & Advanced State Handling (Formik, Hooks, Redux):

Build a Booking Form Module for travel package bookings, implementing form handling with Formik and Yup, state management via Context API or Redux, and graceful error handling.

Mock Assessment 2 Documentation

The screenshot shows a web browser window with the address bar displaying 'localhost:5173/contact'. The page title is 'Contact Us'. The form is centered and contains the following elements:

- Name:** A text input field.
- Email:** A text input field.
- Message:** A larger text area for the message.
- Send:** A blue button to submit the form.

The browser's taskbar at the bottom shows a 'Cold warning' icon and the system clock indicating 04:26 PM on 12-11-2025.

JSON data:

The screenshot shows a web browser window with the address bar displaying 'localhost:3001/packages'. The page displays a JSON array of three travel packages. The 'Pretty-print' checkbox is checked.

```
[
  {
    "id": "1",
    "name": "Paris Getaway",
    "description": "5 days in Paris with Eiffel Tower visit",
    "price": 1800
  },
  {
    "id": "2",
    "name": "Tokyo Adventure",
    "description": "7 days exploring Tokyo's culture",
    "price": 1500
  },
  {
    "id": "3",
    "name": "New York Trip",
    "description": "4 days in the Big Apple",
    "price": 800
  }
]
```

The browser's taskbar at the bottom shows an 'Upcoming Earnings' icon and the system clock indicating 04:28 PM on 12-11-2025.
